Lyngby-Taarbæk City of Knowledge & Urban Development
– A unique connection between DTU Campus and the city

Lyngby-Taarbæk City of Knowledge & Urban Development is a member-based organisation founded by DTU and the other local educational institutions, the businesses community, social housing organisations, and the Municipality.

The overall ambition is to develop Lyngby-Taarbæk into a vibrant university town where students, employees, citizens, and the business community can benefit from the closeness and unique connection between campus and the city.

Projects

Projects run by The City of Knowledge & Urban Development are anchored in the unique triple-helix collaboration between the educational institutions, the business community, social housing organisations, and the Municipality. Current projects include:

ESS & MAX IV – Regional Growth: The project utilises the significant growth potential in the establishment of the ESS and MAX IV research facilities in Lund to strengthen research and innovation capacity in universities and companies.

International city: A number of projects offer support and assistance to international students, scientists, and professionals moving to Lyngby-Taarbæk.

Research collaborations: The project focuses on creating close research collaborations between DTU and companies in order to ensure the transfer of knowledge and technology.

PhD in Facilities Management: The three year project lead by DTU examines how the vision of The City of Knowledge can be executed in the many facilities and spaces in the city.

Celebrating a new academic year: The project brings together educational institutions, the business community, city retailers, and the public sector to mark the beginning of the new academic year by drawing on experiences from university towns around the world.

Networks

The City of Knowledge & Urban Development has established a number of networks that bring together research/educational institutions, companies, and other stakeholders to turn strategic focus areas into projects and activities.

The networks include:

 Climate and Green Technology
 Communication
 Entrepreneurship and Innovation
 Internationalisation
 SMEs and Education
 Urban Development and Trade
 Welfare Innovation
